BROWSER

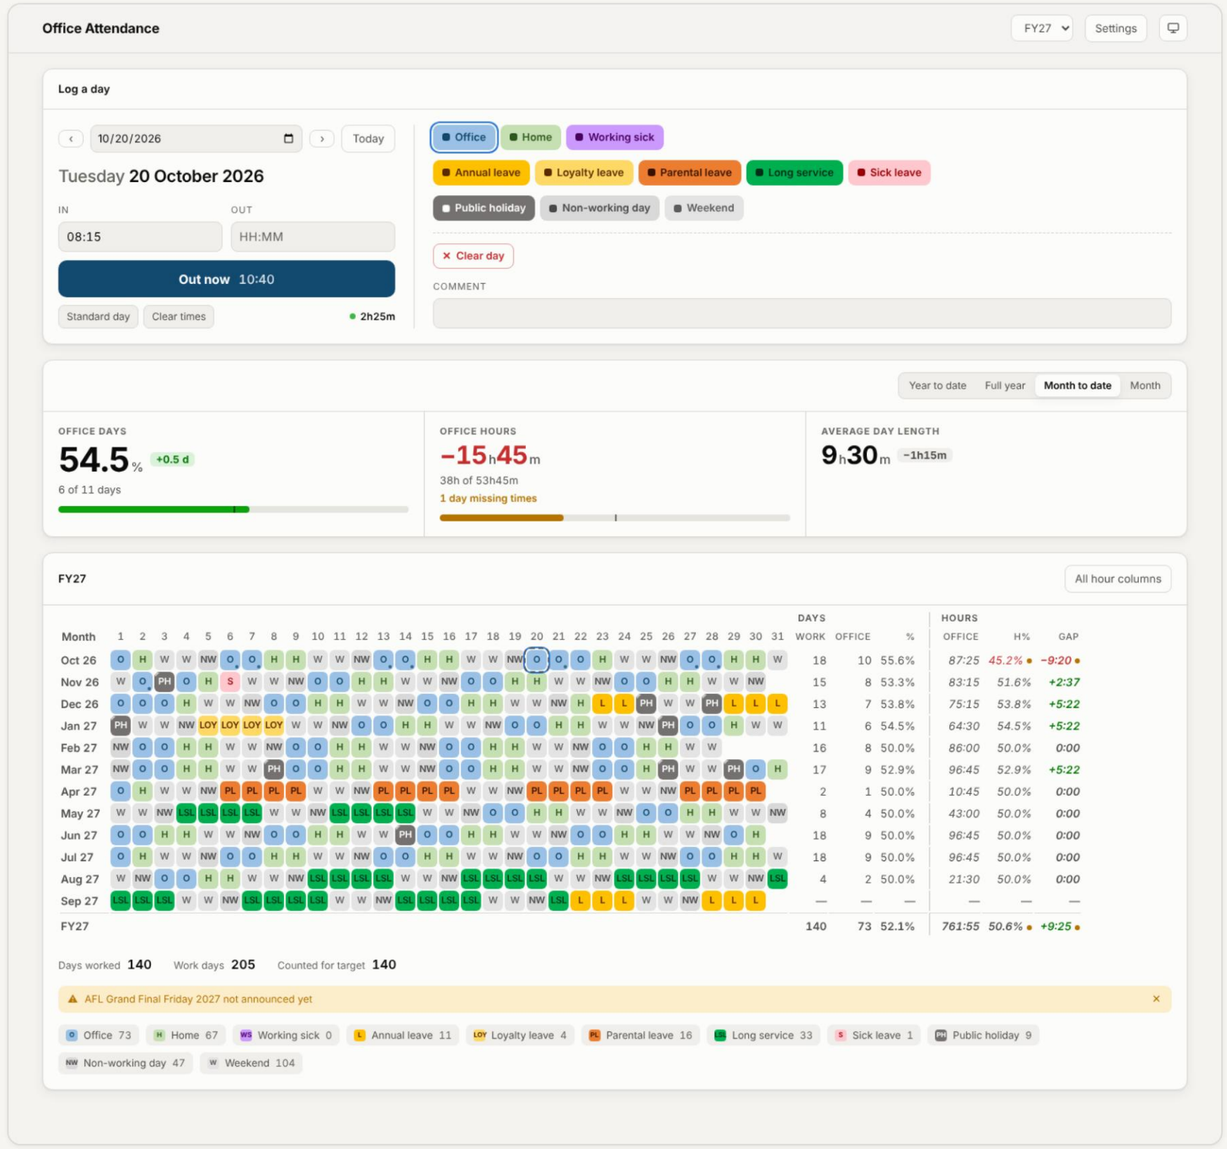

Main screen

- Header: the "FY27 · Oct 2026 – Sep 2027" line is gone, and the version badge only shows when an update is waiting.
- Log a day: the keyboard-shortcut hint under the date is gone. The WORK / LEAVE / NOT A WORK DAY labels are gone; spacing groups the codes, so Clear day and Comment move up. The running hours read "● 2h25m" instead of "2h25m so far".
- Tiles: the "October 2026 · to 20 October 2026" title is gone (the period buttons already say it). "target 6", the "50% × 10 work days × 10h45m" formula and "4 completed days · std 10h45m" moved into the hover text.
- Grid: the title is just "FY27", with no "Click a day to edit…" hint. The totals are renamed Days worked / Work days / Counted for target, without the "O + H + WS" footnotes. The AFL warning is one line.

BROWSER

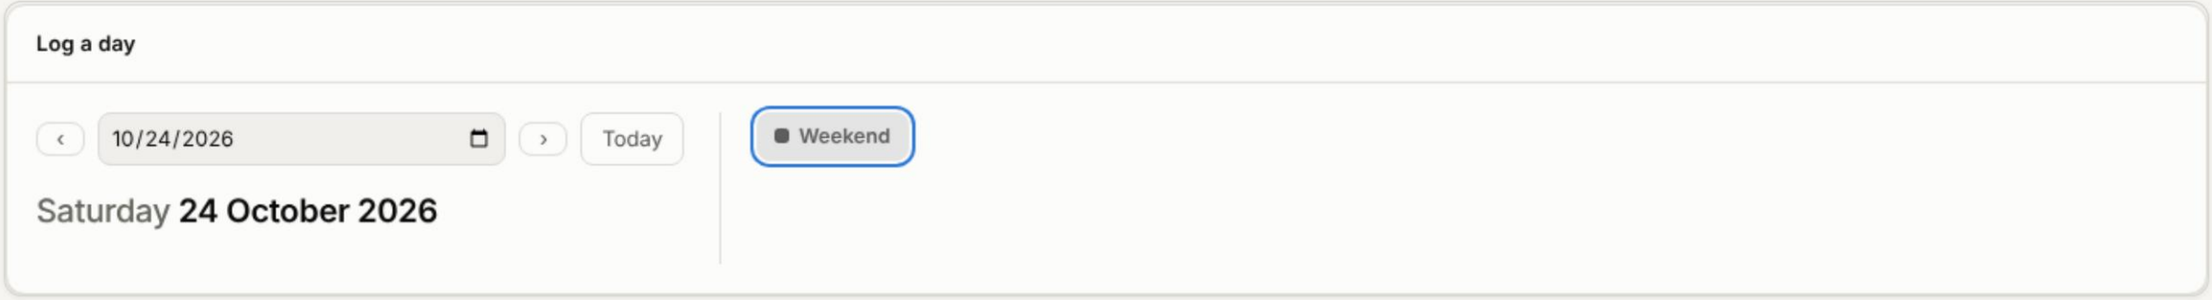

A weekend day

- Before: the whole card, with greyed-out codes, times and buttons, plus a sentence saying it can't be changed.
- After: just the date and its W. Nothing to read, nothing that looks clickable but isn't.

1.18.1 before

1.19.0 after

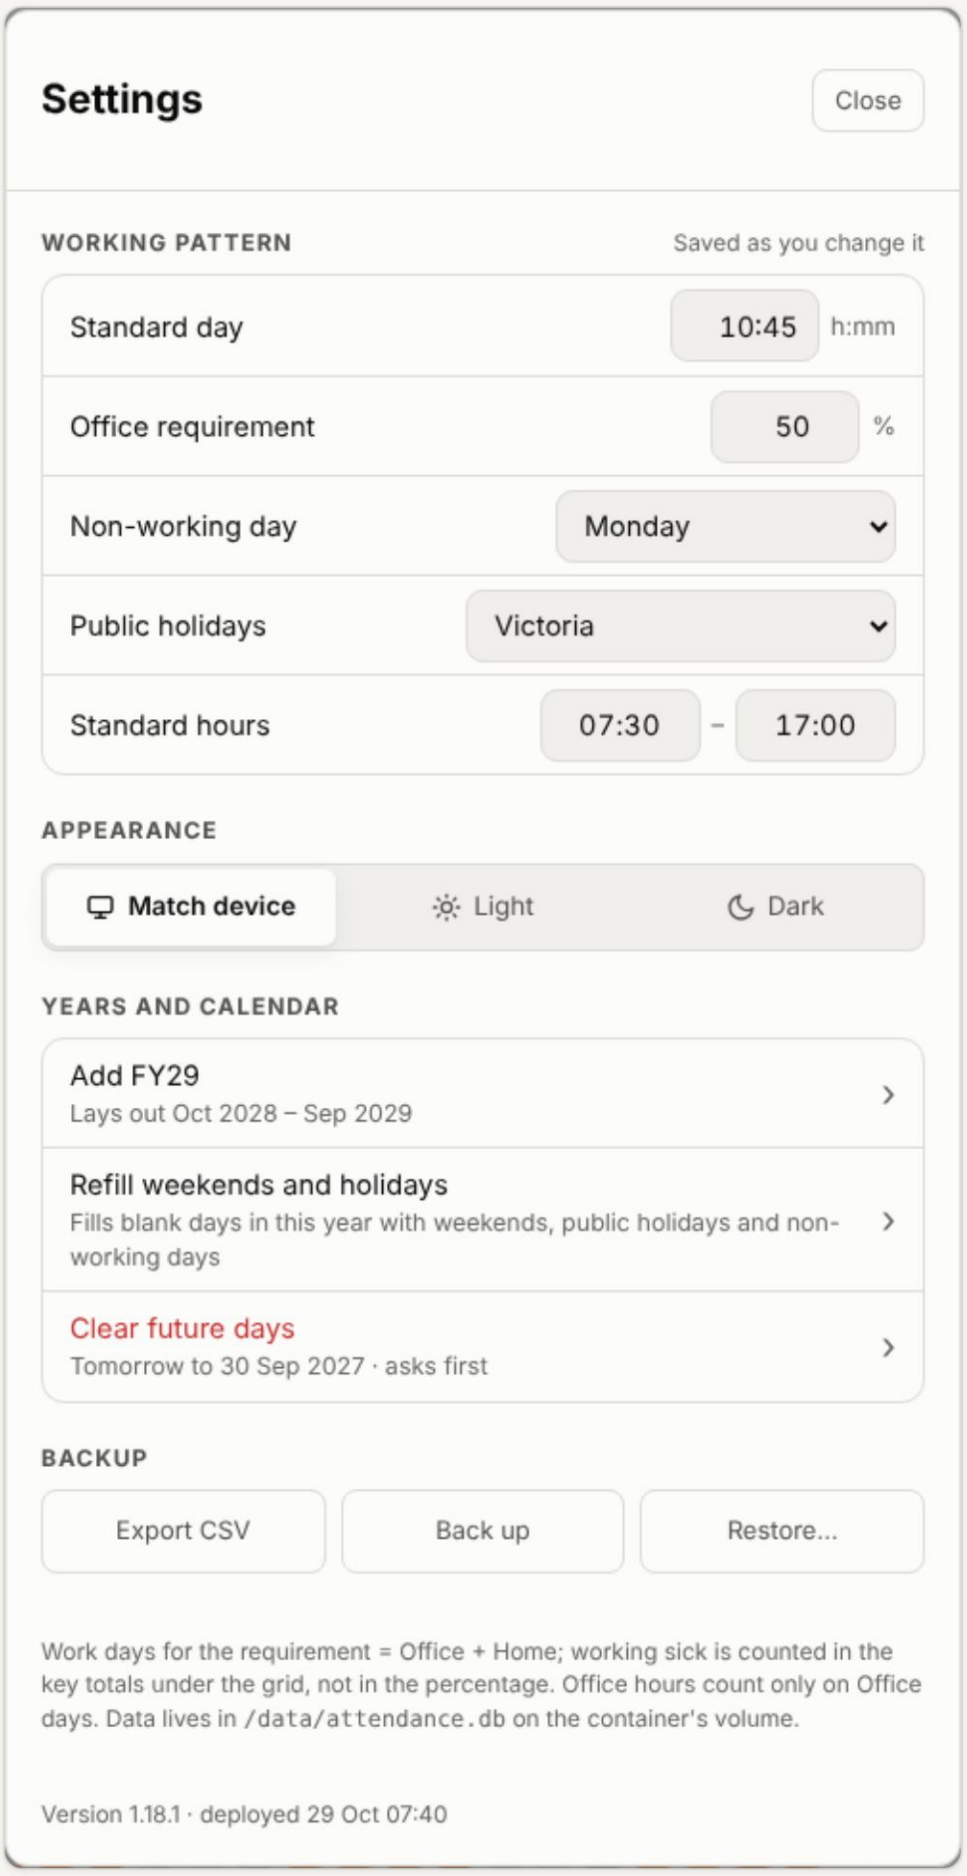

BROWSER

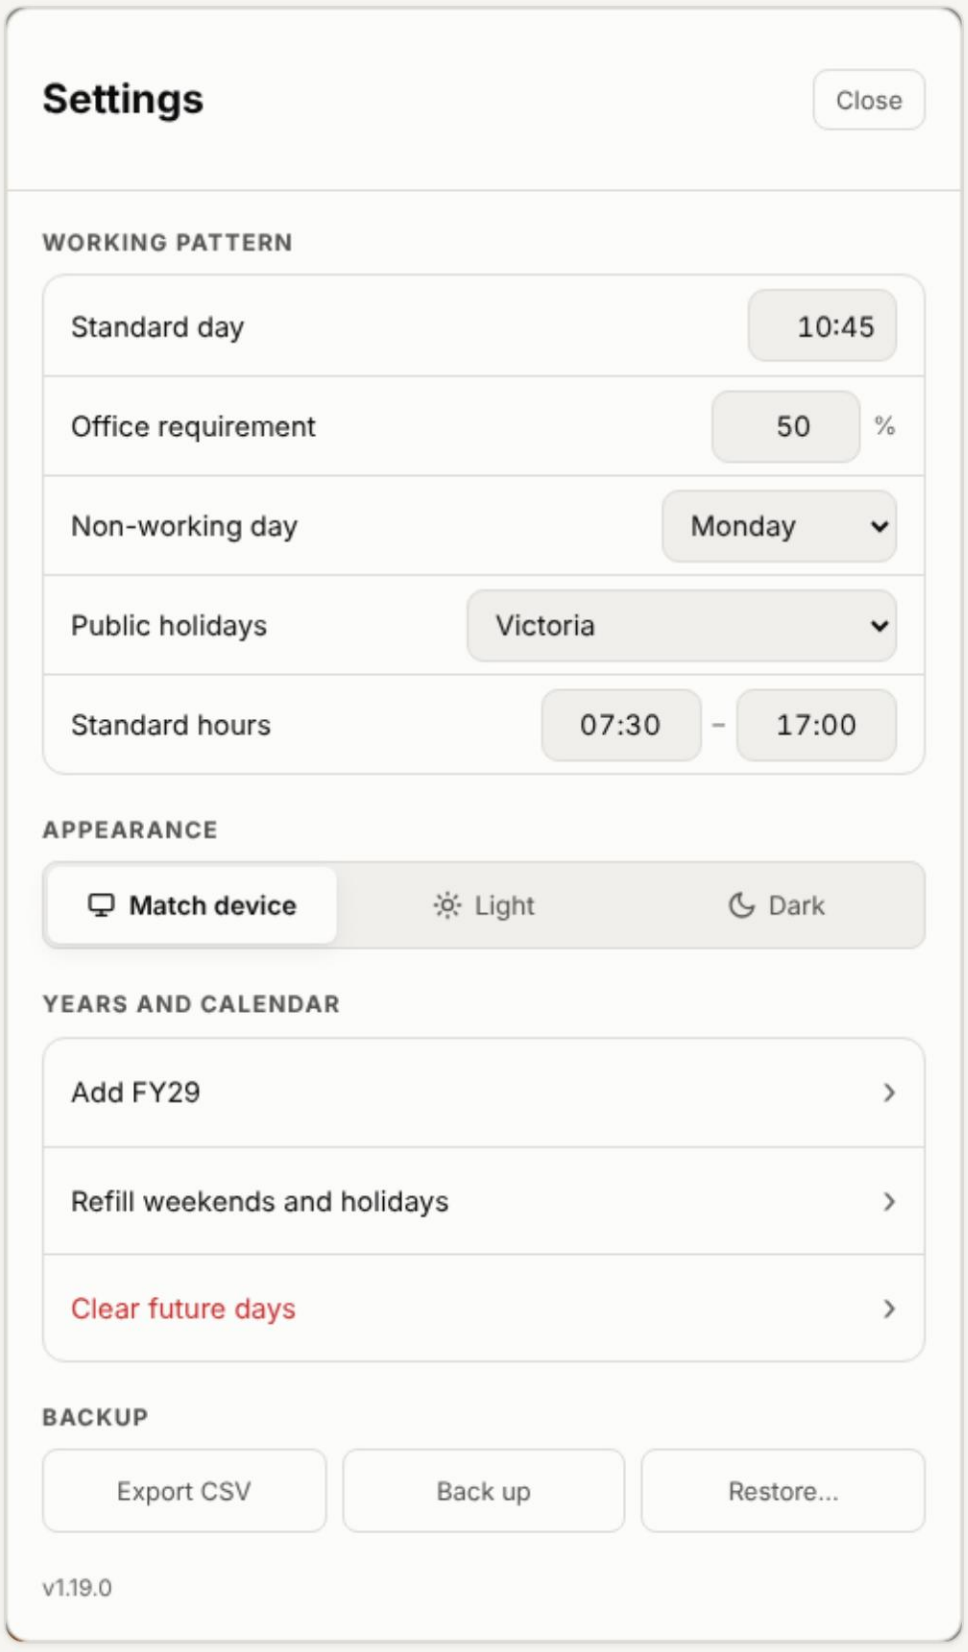

Settings

- "Saved as you change it" and the "h:mm" unit are gone.
- The grey sub-lines under Add FY29, Refill weekends and holidays, and Clear future days are gone (Clear future days still asks before it does anything).
- The footnote about how the requirement is counted and where data is stored is gone (it's in the README).
- The version line is now "v1.19.0"; hover for the deploy time.

1.18.1 before

1.19.0 after

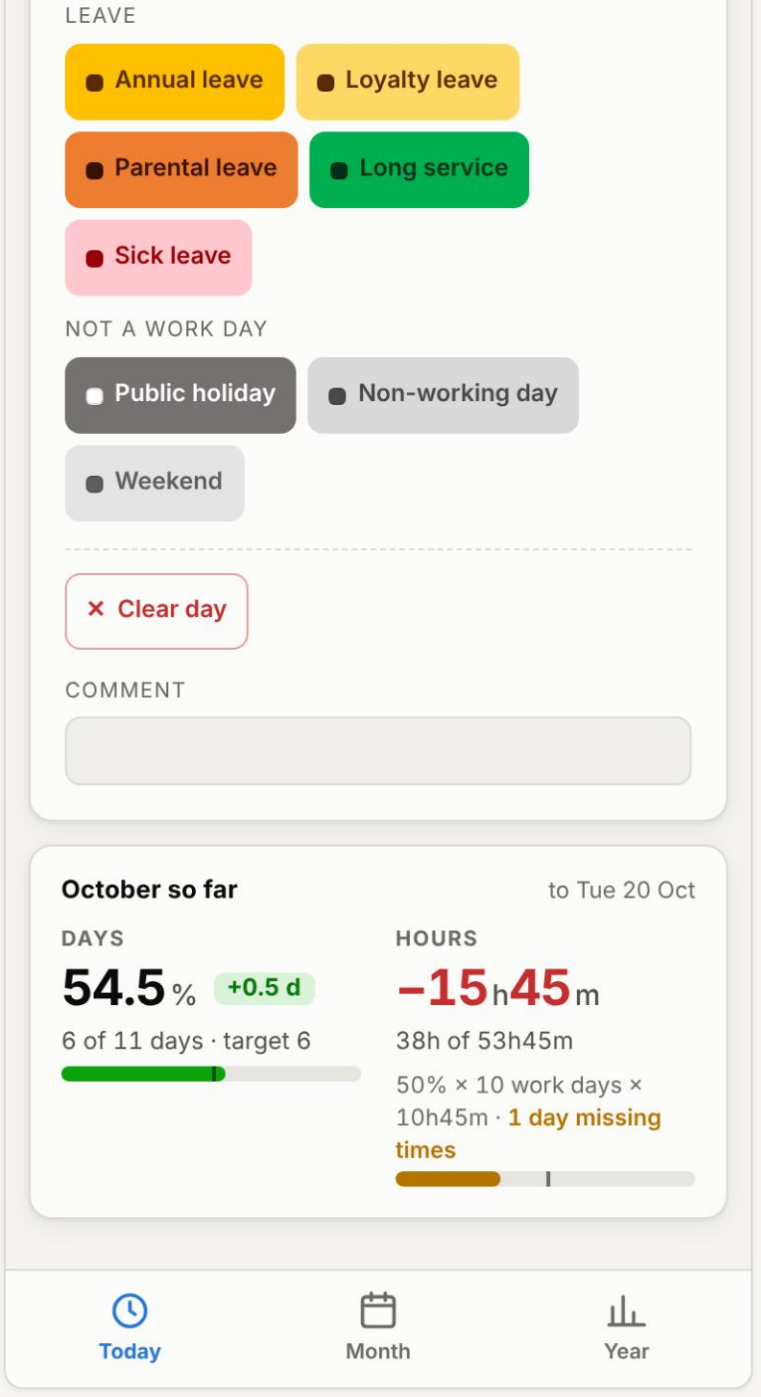

PHONE

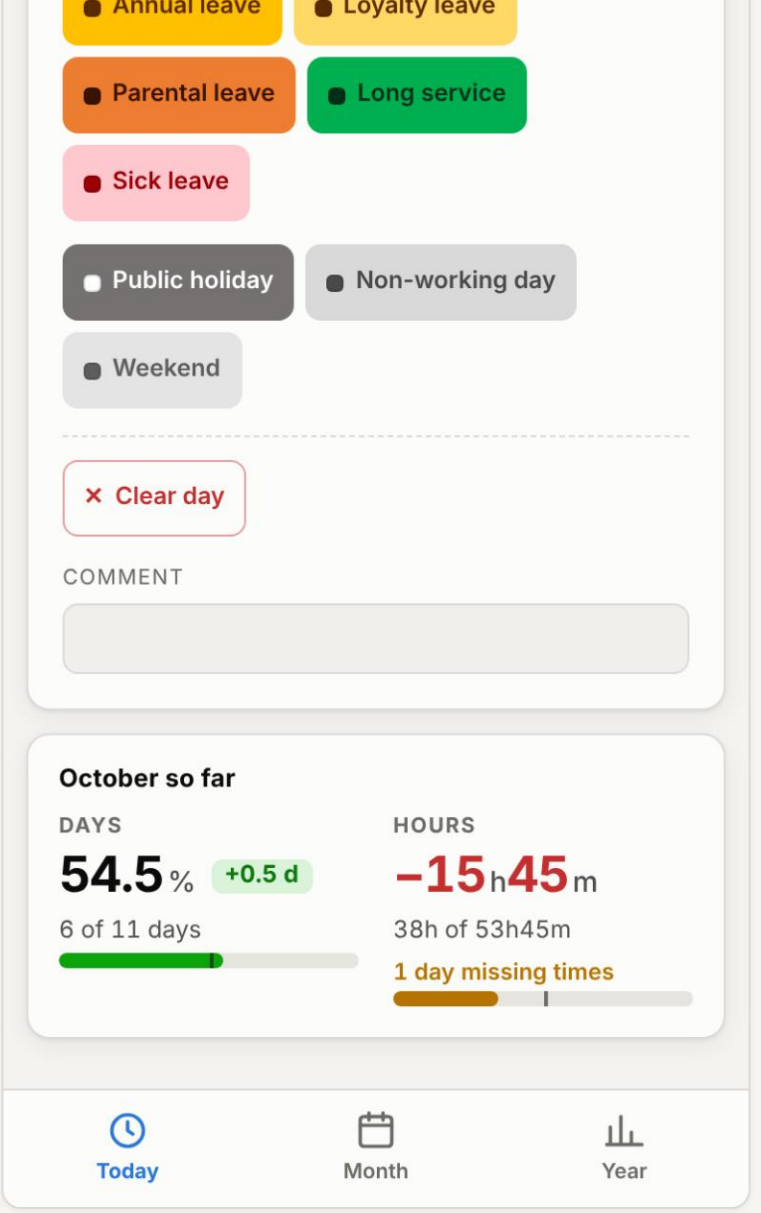

Today tab

- The WORK / LEAVE / NOT A WORK DAY labels are gone, so the codes, Clear day and Comment sit higher.
- The running hours read "● 2h25m" (pulsing dot) instead of "2h25m so far".
- "October so far": the "to Tue 20 Oct" date is gone. "target 6" and the "50% × 10 work days × 10h45m" line are no longer shown on the phone (on desktop they're in the hover text), so the card is shorter.
- The figures themselves are identical.

1.18.1 before

1.19.0 after

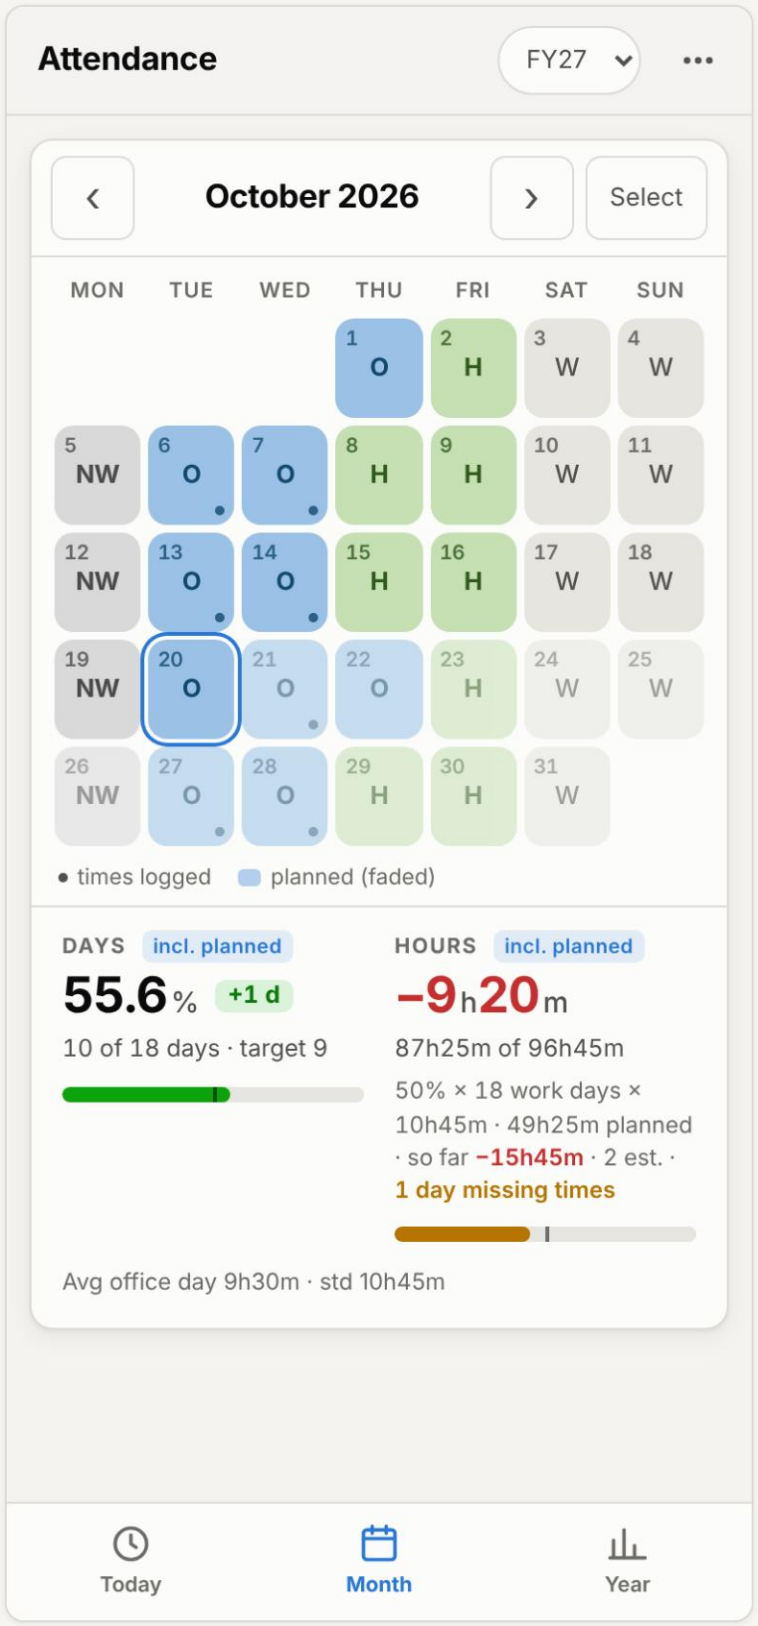

PHONE

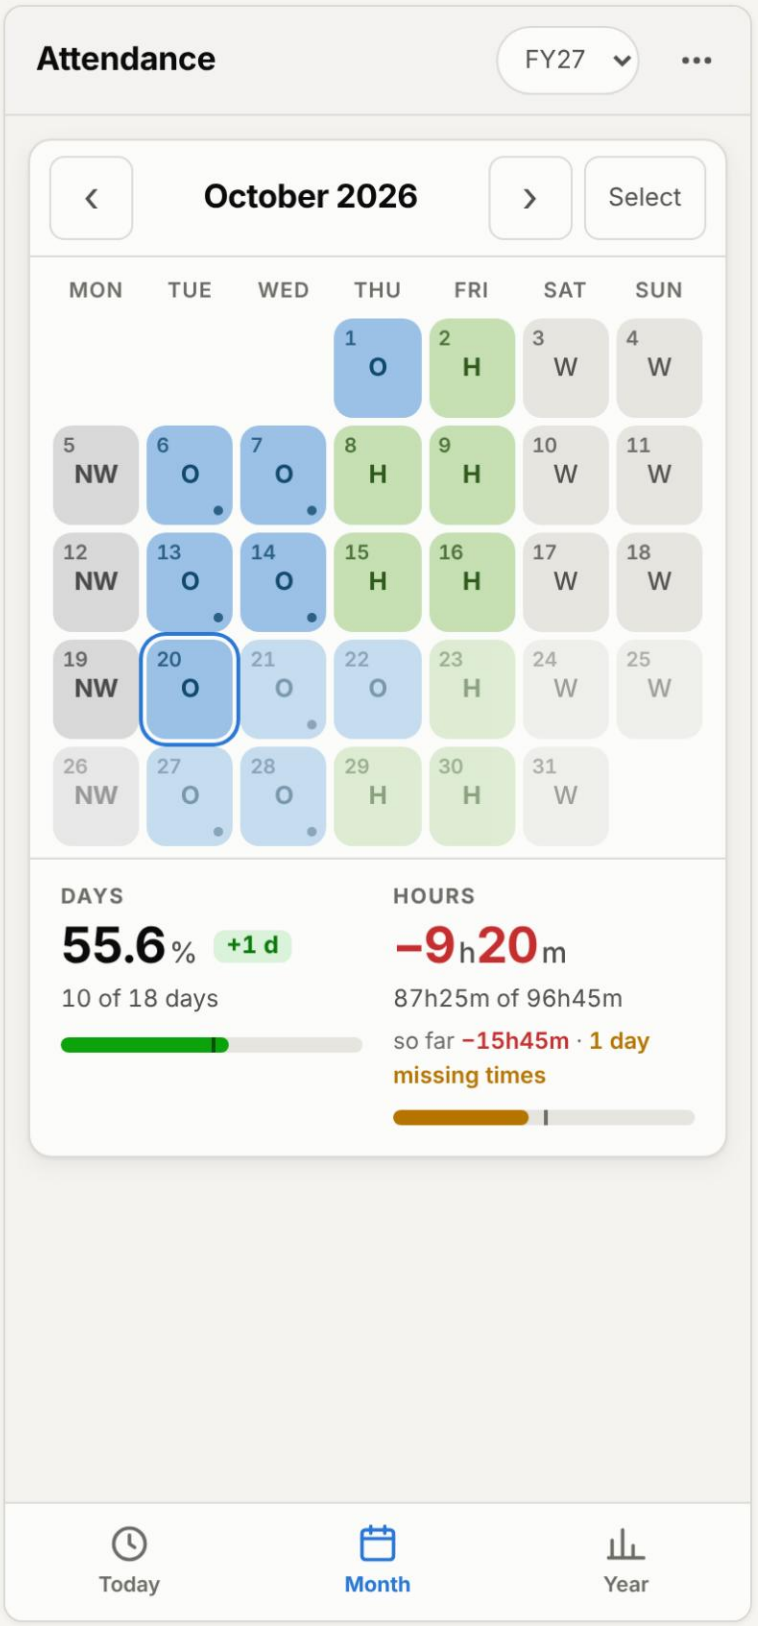

Month tab

- The key under the calendar ("• times logged", "planned (faded)") is gone. Faded days and the dots read without it.
- The "incl. planned" tags are gone.
- Hours note: the formula, planned hours and estimate count are no longer shown on the phone. What's left is "so far" and the missing-times warning.
- The "Avg office day 9h30m · std 10h45m" footer is gone (it's on the Year tab).

1.18.1 before

1.19.0 after

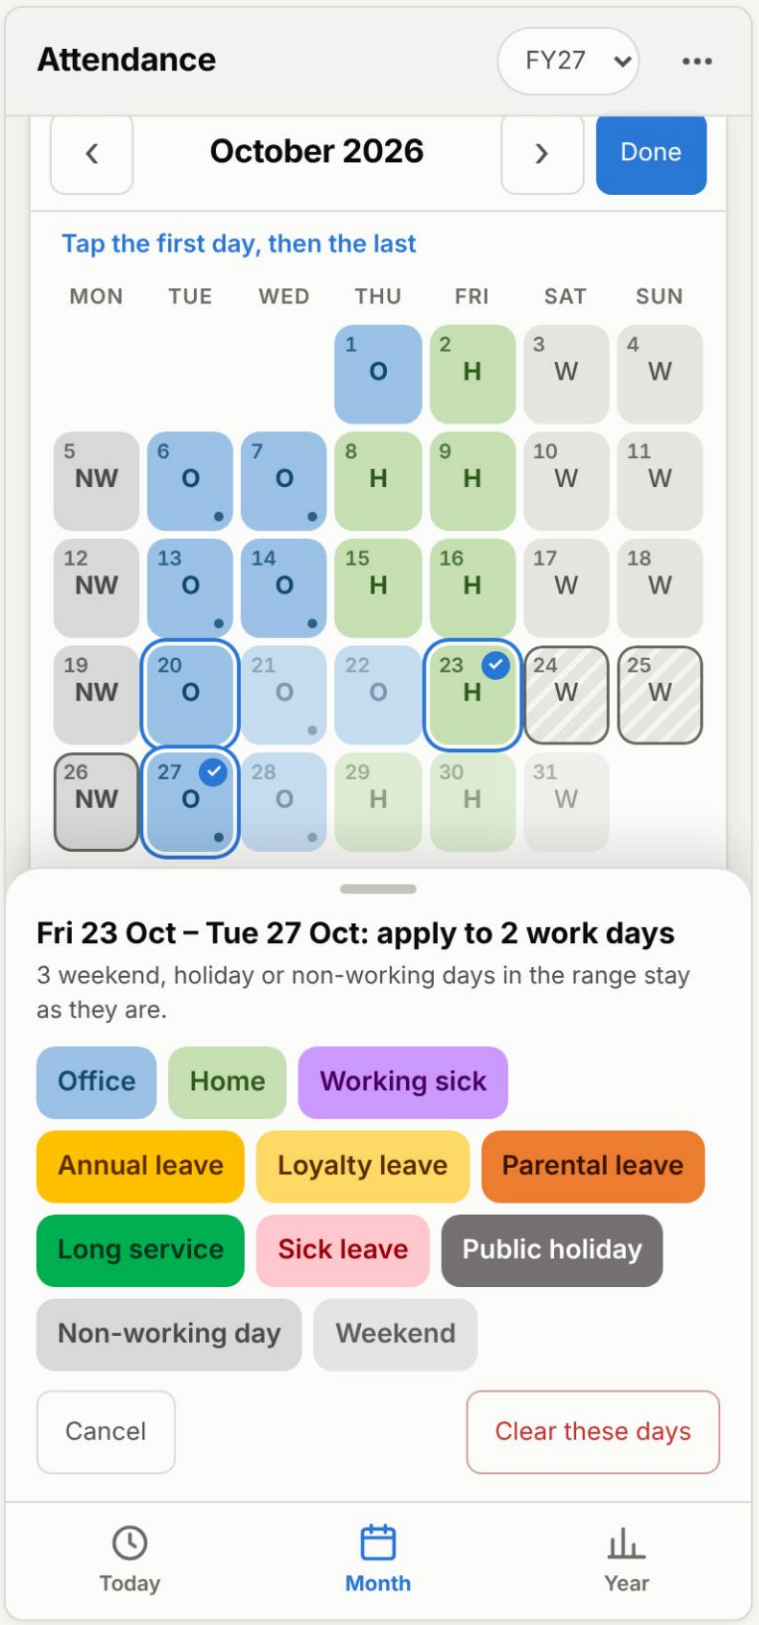

PHONE

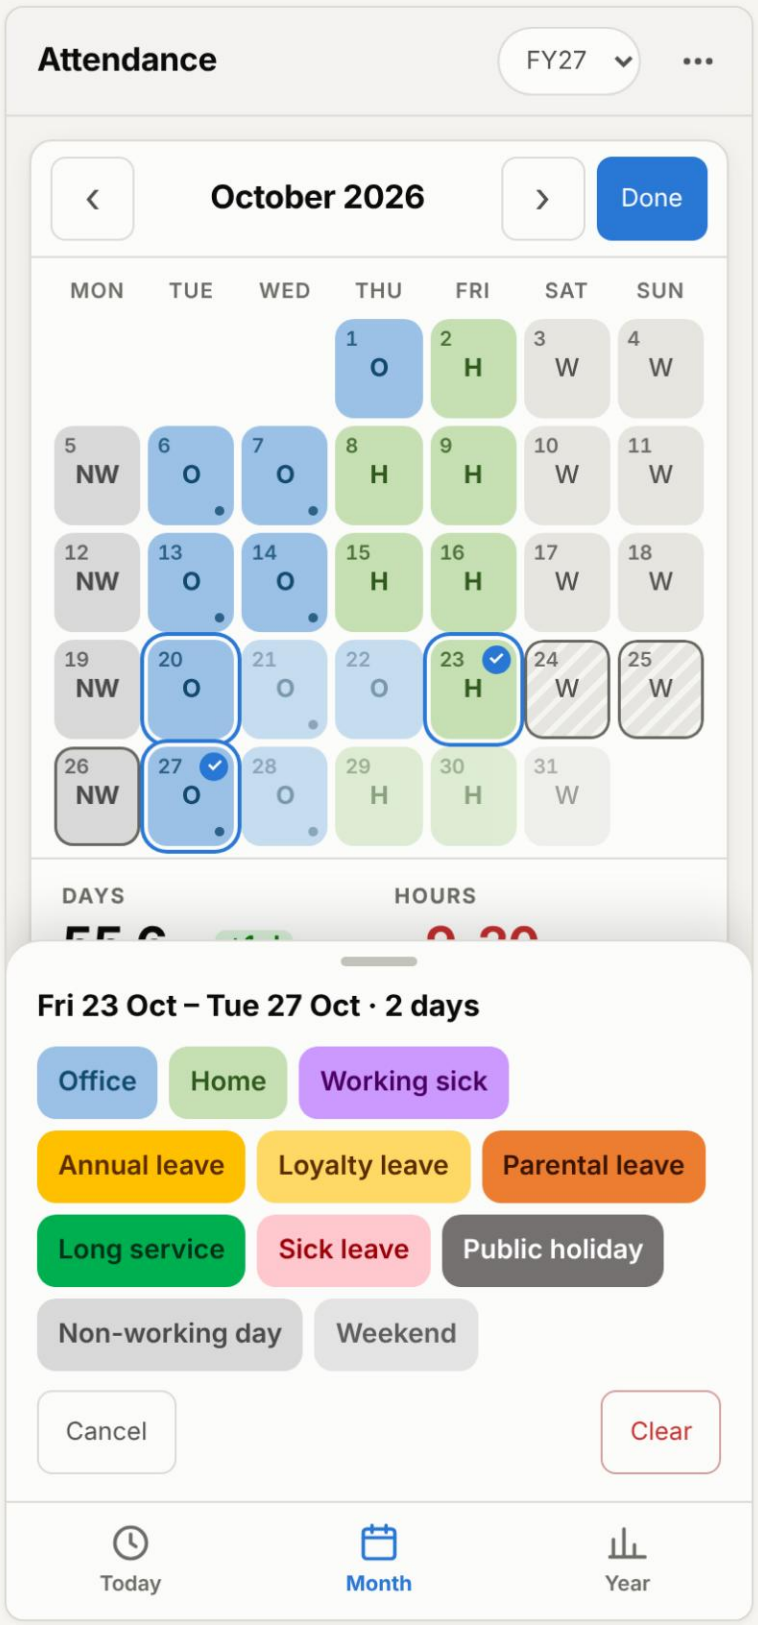

Month tab: selecting days

- The "Tap the first day, then the last" prompt is gone. Select → Done already says you're picking.
- Sheet title: "Fri 23 Oct – Tue 27 Oct · 2 days" replaces "apply to 2 work days" and the sentence about weekends and holidays staying as they are.
- "Clear these days" is now "Clear".

1.18.1 before

1.19.0 after

PHONE

Year tab

- The "October 2026" heading above YTD / Year / MTD / Month is gone.
- The sub-lines ("target 6", the formula, "4 completed days · std 10h45m") are no longer shown on the phone.
- "FY27 by month" is now "FY27", without the explanatory paragraph.
- The totals are renamed (Days worked / Work days / Counted for target). The AFL warning is one line.

PHONE

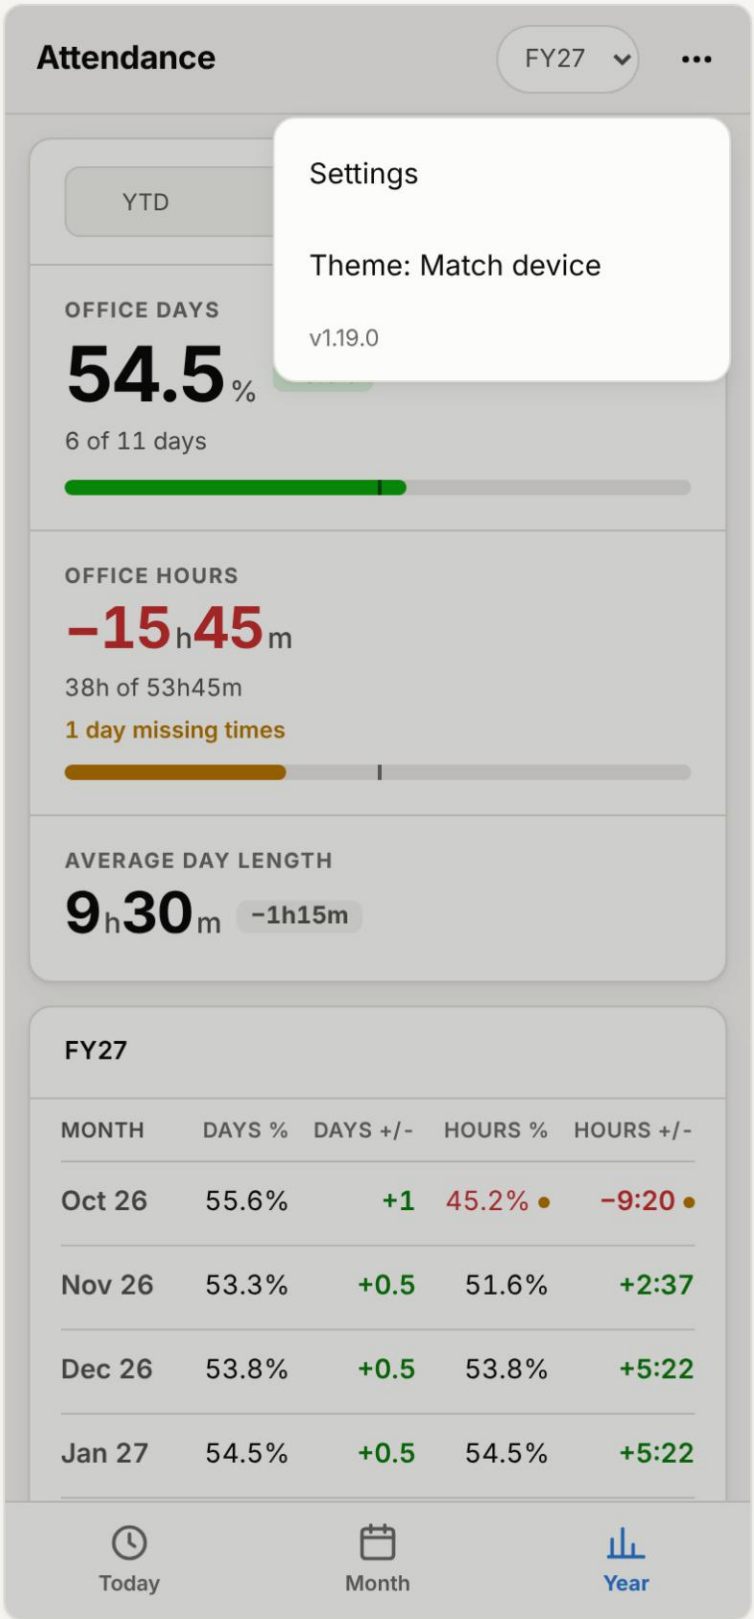

Menu

- "Version 1.18.1 · deployed 28 Oct 20:40" is now "v1.19.0".
- When a newer release is out, an "Update to v..." item appears at the top of this menu.

1.18.1 before

1.19.0 after

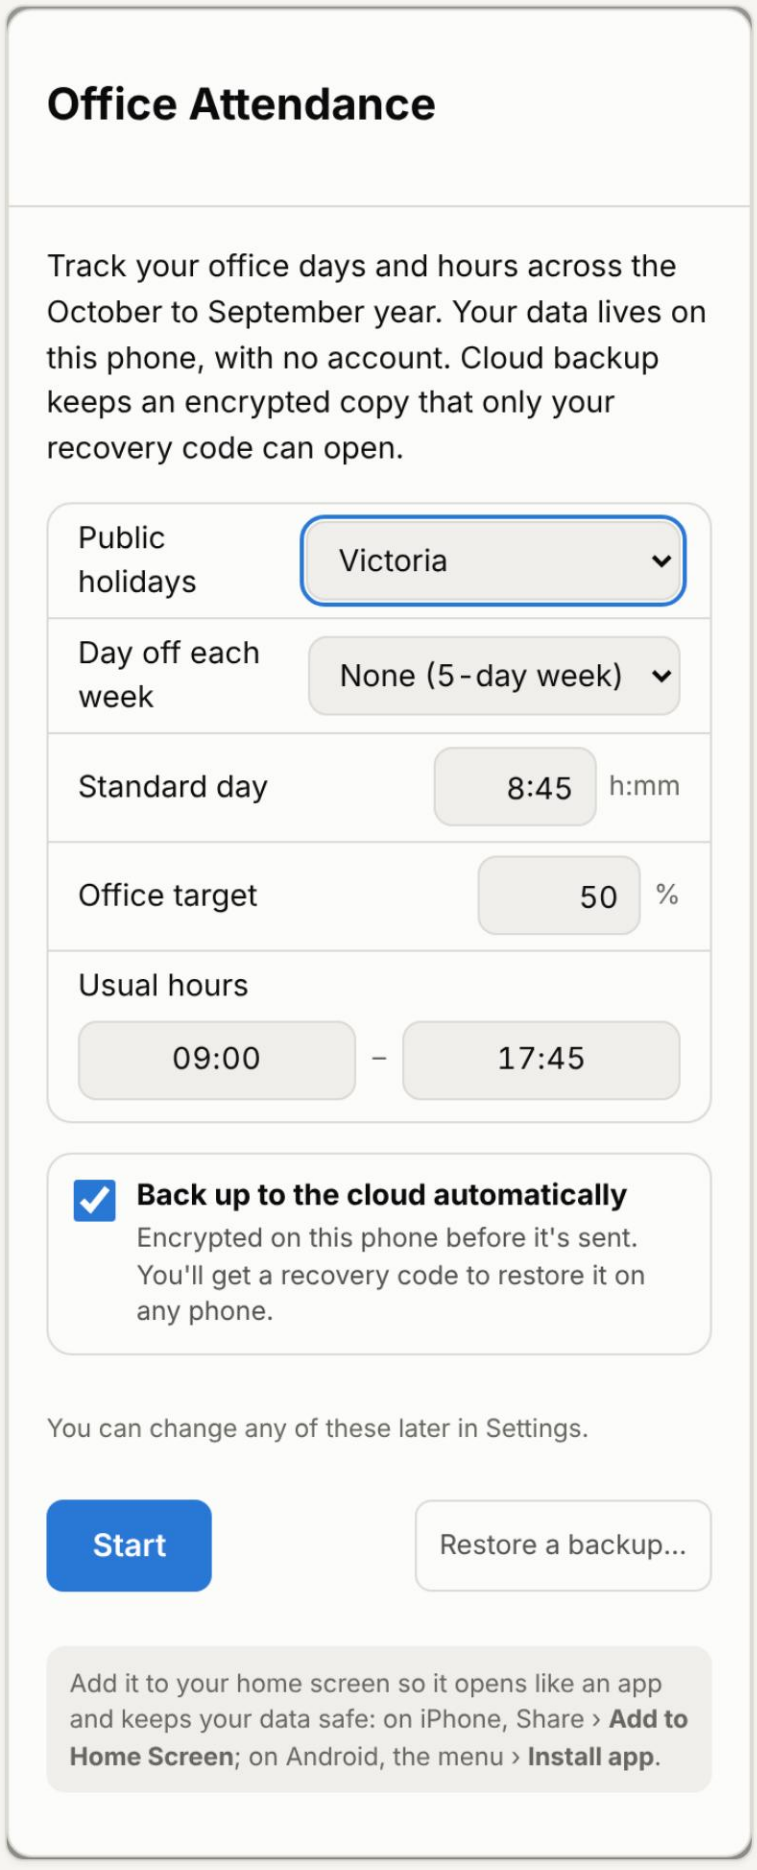

PHONE (CLOUDFLARE VERSION)

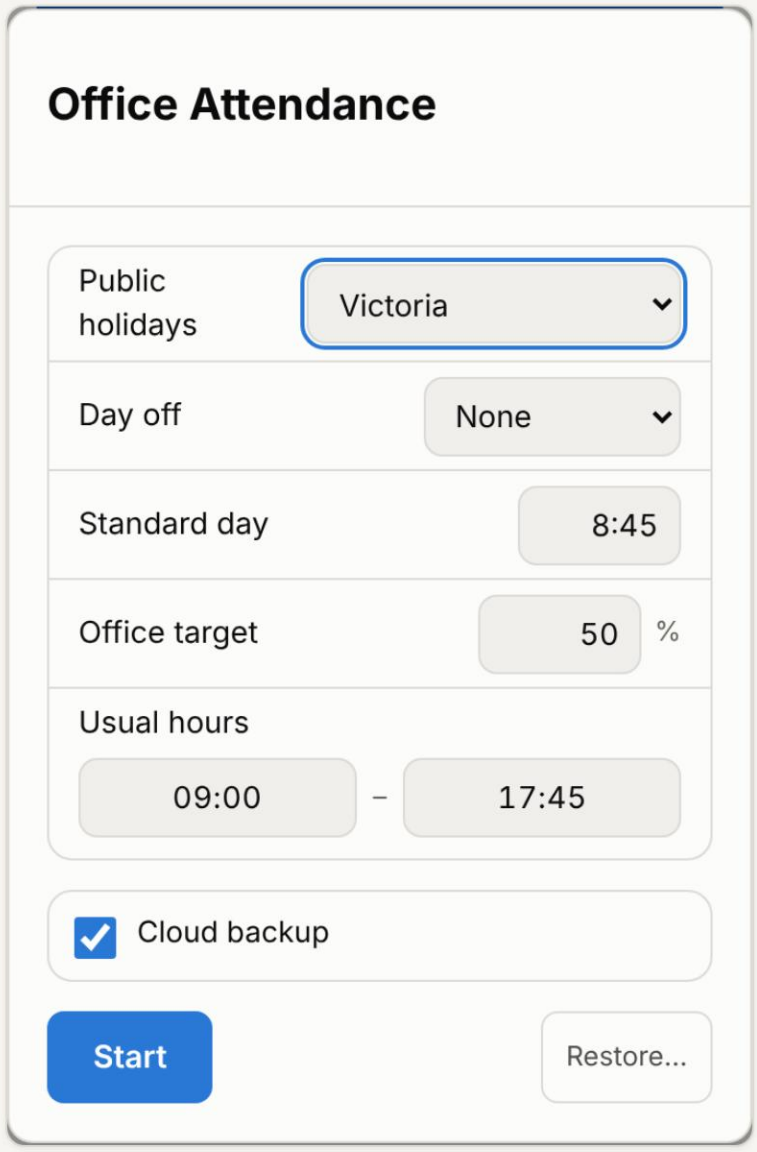

First-run setup

- The intro paragraph, the cloud backup explanation, "You can change any of these later" and the add-to-home-screen tip are gone.
- "Day off each week · None (5-day week)" is now "Day off · None". "h:mm" is gone. "Restore a backup..." is now "Restore...".
- The add-to-home-screen tip became an "Install app" button where the phone supports it.

1.18.1 before

1.19.0 after

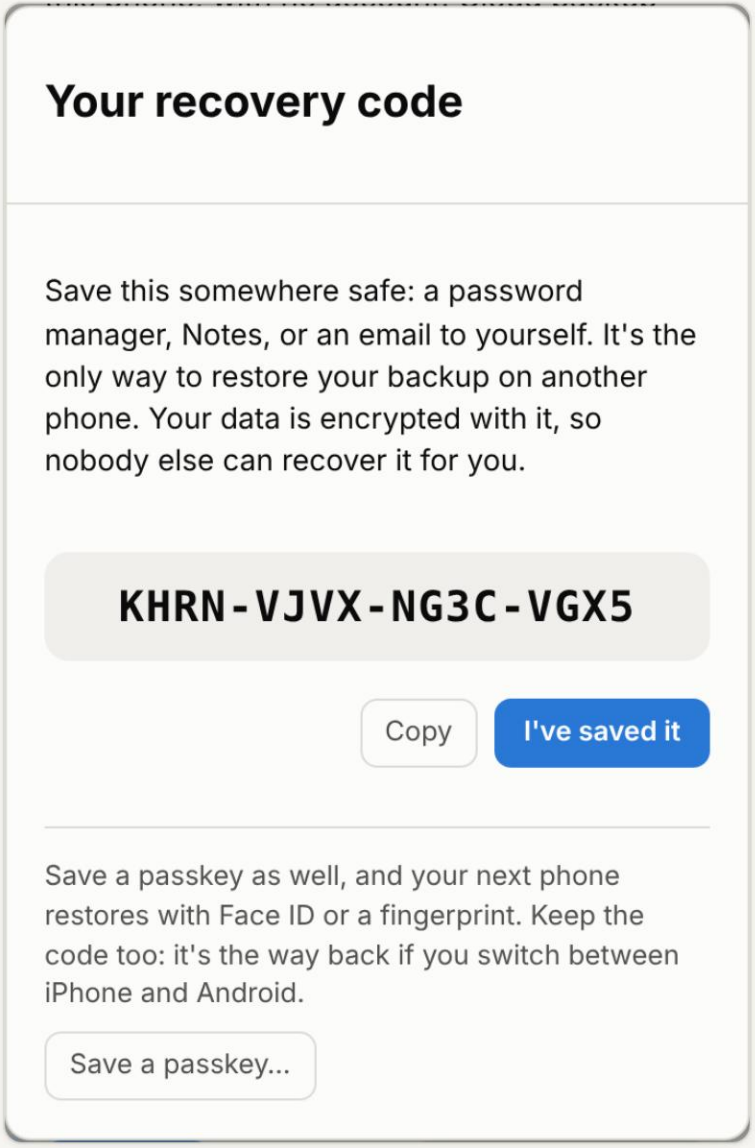

PHONE (CLOUDFLARE VERSION)

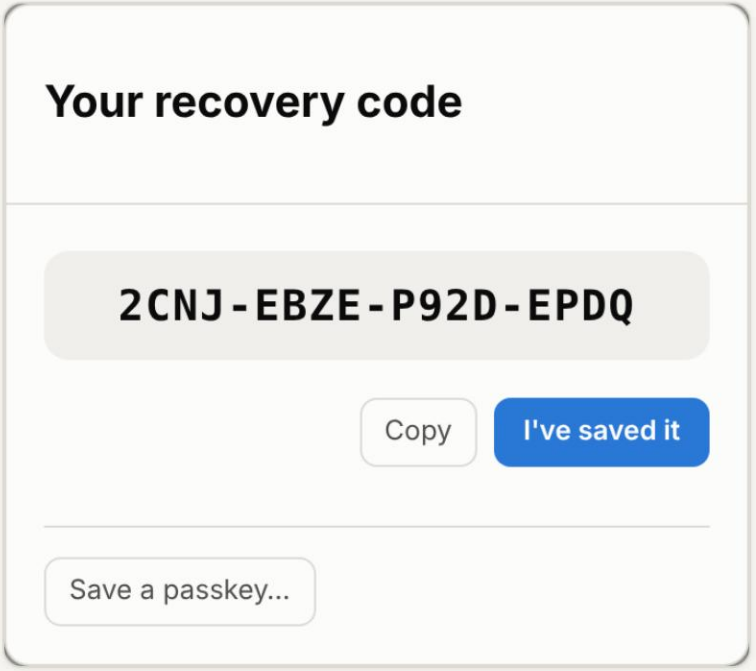

Recovery code

- The paragraph about where to keep the code is gone, and so is the passkey explanation. The code, Copy, I've saved it and Save a passkey… remain.

1.18.1 before

1.19.0 after

PHONE (CLOUDFLARE VERSION)

Settings

- Same trims as the browser Settings, plus: "Cloud backup is on. Backed up just now" is now "Backed up just now".
- The note that the browser could clear the phone's data and the footnote about the requirement are gone.
- The version line and Check for updates now share a row.

BACKUP

Cloud backup is on. Backed up just now

Show code | Add passkey | Restore... | Turn off

Export CSV | Save file | Open file...

The browser could clear this phone's data, but cloud backup has a copy: restore it with your recovery code.

Work days for the requirement = Office + Home; working sick is counted in the key totals under the grid, not in the percentage. Office hours count only on Office days. Your data is kept in this browser on this device, and encrypted in the cloud if cloud backup is on.
